LIQUID

***Bolero Turbo
liquid series***

The taste of quality worldwide

Speed combined with ease of use

Do you want to offer two hot drinks or a variety of drinks? Are you looking for maximum ease of use and little maintenance in a machine? And do you want to benefit from Bravilor Bonamat's proven technology?

The Bolero Turbo liquid series offers the perfect solution for every location; whether you serve large or small quantities of coffee.

This liquid series is developed for liquid concentrate in bag-in-box containers (BIBs). Enjoy your favourite hot beverage in a cup, mug or serve full decanters.

The Bolero Turbo machines generate a professional appearance thanks to the use of durable materials such as stainless steel.

■ Bolero Turbo LV20

The Bolero Turbo LV20 has space for two BIBs of liquid concentrate to serve two kinds of hot beverages simultaneously. You can serve any coffee blend and, for example, choose your favourite flavoured hot chocolate. In addition, the LV20 supplies hot water through a separate outlet for tea or soup.

The ventilation system ensures that the liquid concentrate stays 7°C to 10°C colder than its environmental temperature. This way the concentrate retains its freshness for a long time.

Features LV20

- Space for 2 BIBs of long-life liquid concentrate
- Choice: 2 hot drinks in various cup/decanter sizes (serving simultaneously)
- 4 settings per drink e.g. cup, mug, decanter and free-flow serving
- Separate hot water outlet

General features liquid series

- Clear menu with LCD display
- Quick dispensing
- User-friendly operation with press buttons
- Separate button, and outlet, for hot water
- Large hot water boiler for high volumes (over 7 litres)
- Patented hot water system (less susceptible to scaling) improving the in-cup quality

Instant canisters

The transparent, closable canisters are convenient for filling instant ingredients such as topping (milk powder) and cocoa.

■ Bolero Turbo LV12

The Bolero Turbo liquid series from Bravilor Bonamat features speed and efficiency. These high-volume machines deliver cups, mugs and decanters of coffee, cappuccino or hot chocolate* in next to no time. You can also programme a button to 'free-flow'. An additional button provides hot water for tea or soup through a separate outlet.

The LV12 has space for 1 BIB container of liquid coffee concentrate and two kinds of instant ingredients e.g. topping and cocoa. The unique mixing system of Bravilor Bonamat ensures a perfectly reliable flow of the instant ingredients, thus eliminating any build-up risk.

The ventilation system ensures that the liquid concentrate stays 7°C to 10°C colder than its environmental temperature. This way the concentrate retains its freshness for a long time.

Features LV12

- Space for 1 BIB of long-life liquid coffee concentrate
- Space for 2 instant canisters e.g. for topping and cocoa
- Choice: 8 hot drinks e.g. coffee, coffee crema, cappuccino, latte, chocolate and moccachino
- Separate hot water outlet

* Depending on the ingredients of your choice.

■ About our liquid series

All Bolero Turbo liquid machines feature a descaling signal, a rinsing programme and a manual rinsing function on the control panel itself.

The day and cumulative counters make it easy to keep track of usage. Additionally the machines signal when the drip-tray is full, and offer an adjustable energy saving mode to reduce your energy usage.

No matter whether you prefer your hot drinks by the cup or by the decanter, the Bolero Turbo liquid series offers a reliable solution!

Vacuum flasks

The double-walled vacuum flasks of Bravilor Bonamat keep your coffee in perfect condition.

Available in various sizes:

- 1 litre
- 1.2 litre
- 1.5 litre
- 2 litres

The Bolero Turbo liquid series is specially developed for BIBs of max. 3 L. These high-volume machines serve hot beverages quickly, and can fill two decanters with different beverages at the same time!

Options

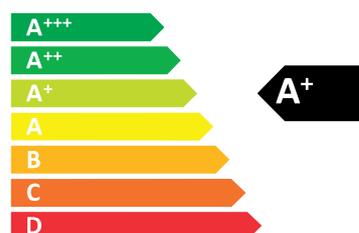

- Customised branding (available on request)
- Cabinet
- Double-walled vacuum flasks in various sizes; the 1 L, 1.2 L and 1.5 L fit the liquid machines. Remove the drip-tray if you'd like to use the 2 L vacuum flask.

We recommend

- Bravilor Bonamat *Renegite* for descaling
- Bravilor Bonamat *Cleaner* for cleaning

Bravilor Bonamat takes corporate social responsibility seriously. We are aware that many industrial processes have an impact on the environment. That is why we are a dedicated ISO 14001 partner; we think *green* and run our business accordingly.

Of course we insist that our products are energy efficient too; most of our machines for instant ingredients and/or liquid concentrate are rated A+ as measured by the industry standard EVA-EMP3.0B (energy consumption protocol).
