

**BRAVILOR
BONAMAT**

LIQUID/SOLUBLES

***Rivero Turbo
Bolero Turbo***

The taste of quality worldwide

The **RIVERO & BOLERO TURBO SERIES** has been developed to meet the requirements of the fast-moving self-service market, such as 24/7 stores, gas stations and catering companies; places where people can help themselves to premium coffees. Depending on the ingredients of your choice, you can serve almost any hot drink!

Obviously, **EASE OF USE** and **SELF-EVIDENT OPERATION** are the key features of these eye-catching dispensers. The series offers solutions for BIBs, solubles or a combination of both for even more flavors. Bravilor Bonamat successfully combines high performance dispensing and advanced technologies, creating exceptional equipment with a **LOW COST OF OWNER-SHIP**.

Rivero Turbo — Liquid concentrate/soluble dispensers

Rivero Turbo 203

LIQUID (2)

- Pre-select S/M/L
- Portion Control
- Push-n-Hold
- 2 drink + separate hot water dispensing
- Simultaneous dispense
- BIB-empty detection
- Ventilated System

Rivero Turbo 123

**LIQUID (1)
SOLUBLE (2)**

- Pre-select S/M/L
- Portion Control
- Push-n-Hold
- 3 drink dispensing
- Simultaneous dispense
- BIB-empty detection
- Ventilated System

Rivero Turbo 121

**LIQUID (1)

The new standard for Liquid and Solubles

**LED
illuminated
front graphics**

Ventilated system
keeps liquid concentrate
air-cooled extending
its lifespan, maintaining
the in-cup quality

**Liquid coffee (BIB)
out-off-product sensor**

Cup sensors do not
allow dispensing until
cups are safely in place
and remain in place

**NSF-certified soluble
canisters**; easy to
remove, disassemble
and re-assemble for
a complete and
thorough cleaning

Patented low maintenance
valve-less brew system
(V.B.S.) and Teflon™ infused
parts to reduce
product caking

Portion Control up
to 3 cup sizes and/or
Push-n-Hold dispensing

Cup lightning
lights up your cup place

Cup clearance up to 7"
for large to-go cups

The Bravor Bonamat patented parts (e.g. water selector and valve-less hot water system) ensure minimum failure. The well thought-out components not only reduce service calls for defective valves, they also avoid costly downtime. In addition, the Teflon™-infused anti-caking mixing units and easy service accessibility result in a low average of service visits per year.
